Our New video Series:

Conversation with Conservationists

As part of the SAFE Worldwide 'Conversation with Conservationists' series, we are pleased to present our interview with Rosamira Guillen, the Executive Director of the Fundacion Proyecto Titi, a sanctuary and organization working to protect and save the remaining cotton-top tamarins in Northwestern Columbia.

The cotton-top tamarin is a small monkey, recognized by the long, white sagittal crest extending from its forehead to its shoulders. The species is found in tropical forests in northwestern Colombia. Their greatest threats are habitat loss and human poaching for the exotic pet trade industry. They are critically endangered with less than 6,000 left in the wild.

Documentary just released:

Mountain Gorillas of the Virungas

Our new wildlife mini-documentary shares facts about the critically endangered mountain gorillas of the Virunga Mountains and honors the men and women who risk their lives protecting these gentle giants.

Shot in Rwanda and Uganda, you get up close and personal with these beautiful beings and learn how precarious their survival is.

Released June 2021.
